Projects

Sentiment Analysis of the COVID-related Reddit Posts (Paper: <https://arxiv.org/abs/2205.06863>)

- **Data Collection:** Gathered comments using Reddit APIs
- **Data Preprocessing:** Filtered and pre-processed raw datasets
- **Topic Modeling:** Applied gensim LDA model for topic modelin
- **Sentiment Classification:** Used NLTK VADER and TextBlob to classify comments
- **Validation:** Sampled and calculated Cohen’s Kappa score
- **Machine Learning:** Applied various algorithms using Python and scikit-learn; confirmed results with Weka

Certificate

AWS Cloud Support Associate Professional Certificate

- ---(In progress, finishing in 1 month)---
- An industry-recognized programme designed to build foundational cloud-troubleshooting and support skills on AWS, including fault-root-analysis, automation with AWS CLI/ CloudFormation/Python, networking and monitoring of AWS workloads.

Location

Toronto/Markham, Ontario, CA
(willing to relocate)

Portfolio

<https://krancce.github.io/>

Education

Bachelor of Computer Science

Skills

C# Python Java MySQL
AWS/Cloud JavaScript HTML
Microsoft-SQL-Server Git
Unity-Engine OpenAI-API
Natrual-Language-Processing

Experience

Software Developer ---CASH4YOU (Mar 2025 - Aug 2025)

1. **Bridge financial operational expertise with innovative technical solutions** to drive business efficiency and digital transformation.
2. **Automated branch audits** using an AI-powered inspection system (OpenAI vision models API), seamlessly integrated into the company website.
3. **Streamlined recruitment** by architecting and managing an AI-driven automation process for candidate evaluation and communication.
4. **Maintained and enhanced mission-critical systems**, providing daily technical support and ensuring smooth business operations.
5. Gained **valuable operational insight** through intensive branch training, directly supporting customer loan processes.
6. **Reported directly to the CEO**, providing technical updates and recommendations for continuous improvement.
7. **Trained and managed offshore technical team**, coordinating with team leaders on issue resolution, interviewing and onboarding new members, and providing ongoing technical guidance.

Junior Software Developer ---CAST Group of Companies (Feb 2023 - Mar 2024)

1. **Integrated 3D tracking with PTZ cameras** for automated target tracking in live shows, significantly enhancing user experience.
2. **Developed an event-driven system** enabling dynamic camera automation based on specific show conditions.
3. **Created a robust serialization system** for efficient data storage and persistence of in-game content and user preferences.
4. **Improved GUI usability** with drag-and-drop functionality for enhanced user productivity.
5. **Resolved NDI communication issues** for reliable camera control and contributed to **multilingual support** (Chinese Simplified/Traditional).
