EXPERIENCE

Cash4You - Junior Software Developer *Feb 2025 - Sept 2025*

- Built a Python-based AI automation system using OpenAI Vision models to evaluate branch appearance across 80+ locations, integrating with a local SQL database to automate and scale the audit process.
- Utilized an automated recruitment pipeline to evaluate candidates and streamline the hiring workflow.
- Provided daily technical support and maintenance for internal systems and business operations.

Tech Stack: Python, OpenAI API, SSMS, MySQL, Git, Confluence

CAST - Junior Software Developer *Feb 2023 - Mar 2024*

- Participated in the design and implementation of an event-driven PTZ camera automation system using Unity Engine and C#, enabling dynamic camera control that adapts to real-time live show conditions.
- Contributed to detailed system improvements including data serialization, UI enhancements, and bug fixing to improve performance and user experience.
- Resolved NDI communication issues and supported multilingual system functionality for reliable live production environments.

Tech Stack: C#, Unity Engine, PTZ Camera Systems, FreeD/NDI Protocol, Git

EDUCATION

University of Ottawa - Ottawa, CA *May 2022*

Honors Bachelor's Degree - Computer Science

Graduation Project: Sentiment Analysis of COVID-related Reddit Posts

Involved in data collection using Reddit APIs, preprocessing raw datasets, and training NLP and machine learning models to classify sentiment; validated results and published the research paper. --- **(Paper: <https://arxiv.org/abs/2205.06863>)**

CERTIFICATE

AWS Cloud Support Associate Professional Certificate

---In progress, finishing in 1 month
