

# Xavier Yang (Software Developer)

Toronto, Ontario, CA | Xavieryang99@gmail.com | +1(819)919-9209

## EXPERIENCE

---

### Cash4You - Junior Software Developer (Feb 2025 - Sept 2025)

- Developed and deployed end-to-end AI automation pipelines using Python and OpenAI API, automating branch inspections and candidate evaluations to reduce manual workload by 90%.
- Integrated AI-generated insights into MS SQL Server for real-time reporting and provided L2 technical support to ensure high availability of internal business systems.

(Tech Stack: Python, OpenAI API, MS SQL Server, Git, Confluence)

---

### CAST - Junior Software Developer (Feb 2023 - Mar 2024)

- Engineered an event-driven automation system for Industrial PTZ Cameras using C# and Unity. Implemented real-time control logic via NDI/FreeD protocols, ensuring high-reliability performance for live broadcast environments.
- Optimized system stability and UI performance, resolving critical communication issues and implementing multilingual support for diverse broadcast environments

(Tech Stack: C#, Unity Engine, FreeD/NDI Protocol, Git)

## PROJECT

---

### Depin - Founder & Lead Developer ([www.depin.careers](http://www.depin.careers))

- **Architected and launched** a niche professional networking platform using **Next.js** and **Java SpringBoot**, designing a scalable system to support job matching, user connections, and real-time interactions.
- **Orchestrated** a serverless backend infrastructure leveraging **Supabase** for database management, authentication, and storage, ensuring rapid feature deployment and minimal operational overhead.
- **Implemented** a professional **CI/CD workflow** with Staging/Production environments using **GitHub Actions, Vercel, and Docker (Render)**, managing the full software development lifecycle from local dev to production.

## EDUCATION

---

**University of Ottawa** - Honors Bachelor's Degree - Computer Science (May 2022)

## PORTFOLIO
